FORT LOUDOUN ELECTRIC COOPERATIVE
VONORE, TENNESSEE
Board Policy No. 317

SUBJECT: **METER CENTER LOCATION**

POLICY:

Upon request for a meter center location by a member, an employee of the Cooperative in the Engineering Departments will visit the site and designate the location for the meter center. Said meter center location shall be on the exterior of the building/structure, or on a meter pole. This location must be accessible at all times, and in the most economical and convenient place for both the member and the Cooperative. The location should be installed so that the meter to be monitored/read is located in the socket at eye level. Locations should not be obstructed or enclosed by parts of the structure.

Cooperative employees have the right to access premises. All members will allow Cooperative locks to be placed in gates without dispute, if necessary for access. All members will furnish an access code or means of access to the Cooperative without dispute. Failure to provide access or threatening of employee access to Cooperative equipment can justify suspension of power supply by the Cooperative and/or membership.

RESPONSIBILITY: General Manager/CEO
Assistant General Manager
Vice President of Operations/Engineering
Engineering Personnel
